+ EMPLOYMENT

- 2017 **reinteractive**
Senior Software Developer
I work directly with clients to achieve their desired outcome and making sound recommendations.
I work for a period of time in one project and then move to a new one, quickly learning its requirements and the domain knowledge necessary for its success.
During professional development days I'm focused on code architecture, object oriented design, best practices, testing, and buzz word bingo.
- 2015-2017 **Cohort Solutions**
Software Developer
Maintained and wrote new feature for a suite of applications using Ruby on Rails and React. I have also pushed for more automated tests and quality tools, such as Rubocop.
- 2014-2015 **Scout Talent**
Software Developer
I was brought in as their first in-house developer to maintain their main application, implement the first version of a second application, and set the standards for a future team.
- 2013-2014 **Mobile Technologies**
Software Developer
Maintained with a module in PHP and one in C#. I was also one of the two developers that rewrote the PHP module in Ruby on Rails
- 2012-2013 **GEA Interactive**
Ruby on Rails Developer
Develop, maintain, and refine front and backend of a number of different applications using Ruby on Rails, HTML5, CSS3, LESS, Coffeescript.
- 2012-2012 **Stay247**
Programmer
Build new and maintain existing company's website using PHP/Zend Framework, MySQL and JQuery.

+ EDUCATION

- 2010 - 2012 **Bachelor of Information Technology**
Griffith University
- 2009 - 2010 **Diploma of Information Technology**
Queensland Institute of Business and Technology
